

Dry Matter Analysis in Less than A Minute

Instant Feed Analysis

SciO is the world's smallest and most affordable dry matter analyzer, combining accuracy, speed and ease of use. It revolutionizes feed analysis by moving decision making out of the lab and into the field.

Consistent Dry Matter

- Ensure **consistent dry matter in feed**
- Test **daily**
- Adjust rations** in real time
- Adjust for **rain and snow events**
- Regular **app updates**
- Simple to deploy, simple to use**
- Optimize harvest timing by testing **dry matter in the field**
- Measure common silage types: **Corn, Legume, Grass, Mixed, and more**

ULTRA-PORTABLE INSTANT RESULTS

Koster, microwave and lab tests are just too slow. Track, manage and optimize every step of the way on site, when and where needed.

OPTIMIZE MILK PRODUCTION

Don't suffer drops in butter fat percent for not monitoring dry matter. Test daily. Adjust after rain or snow events.

ON PAR WITH EXISTING METHODS

Experiments show that SciO is just as accurate, consistent and repeatable as current testing methods
